Bumblebee

Did you know **bumblebees** hibernate underground?

Butterfly

This is a **monarch butterfly**, which can be found in sub-tropical to tropical areas.

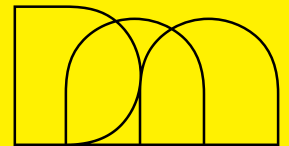

Snail

This looks like the garden snail shell, but it's actually from a **sea snail!**

Beetle

The **stag beetle** is the UK's largest beetle, and can be found in gardens and woodland.

Millipede

This curious creature is a **mole cricket**, and like a millipede, it burrows into the ground to make its home.

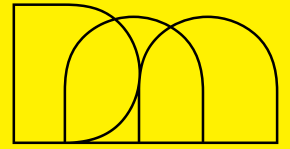

Woodlouse

The **great diving beetle** has a tough shell, just like a woodlouse.
